

Portable Rechargeable Floodlight

A portable battery powered floodlight that provides up to 7 hours of continuous emergency lighting.

The basic unit consists of a lightweight weatherproof lamp housing with a '2D' fluorescent lamp and integral rechargeable battery and charger. The unit can be charged from 24vDC vehicle supplies or directly from the mains with the optional mains adaptor.

The swivel mounting bracket allows complete adjustment to the angle of illumination. The floodlight is rated to IP65 with waterproof leads and connectors.

The lamp head and lightweight battery are integral and the unit is easily used as a powerful handlamp.

Alternatively, the lamp head can be mounted on top of an optional tripod which raises the lamp by 1.4m.

A 2 hour battery charge gives 4 hours of operation and a 5 hour recharge gives the maximum 7 hours of operation.

The basic unit is 240x230x230mm and 6kg. Overall height with mast is 1.6m

Item	Stock No.
Floodlight	110-233
